

Industrial Diesel Power Generator

This is a heavy-duty industrial generator used for providing backup or primary power. It features a robust diesel engine coupled with an alternator, mounted on a sturdy base frame.

Overview

Industrial Power Generation Solution

This heavy-duty industrial diesel generator is engineered for reliable power delivery in demanding commercial and industrial environments. Designed as a complete power generation system, it integrates a robust engine with a high-performance alternator on a durable base frame. The unit features comprehensive cooling and exhaust systems to ensure consistent operation and longevity in continuous duty applications.

Certifications

Market Status

HOT

Compliance & Standards

CE, ISO 9001:2008, UL

Technical Specifications

Fuel Compatibility

- Diesel
- Gas

Engine Type

Diesel Engine
