

Industrial Double Girder Bridge Crane

This heavy-duty bridge crane is designed for industrial lifting applications. It features a robust steel structure, high lifting capacity, and precise control for safe and efficient material handling.

Overview

Industrial Double Girder Bridge Crane

This heavy-duty double girder bridge crane is engineered for demanding industrial lifting applications. It features a robust steel structure designed for maximum durability and reliability in challenging environments. With high lifting capacity and precise control systems, it ensures safe and efficient material handling for various operational needs.

Performance Metrics

Maximum Lifting Capacity

540 t

Max Capacity

Technical Features

Key Design Features

Heavy-duty, Robust Steel Structure, Precise Control, Multiple Hoisting Mechanisms

Safety & Compliance

Safety Features

- Integrated safety monitoring
- Reliable performance systems
- Industrial-grade structural integrity
