

Industrial Electric Fan

This industrial-grade electric fan is designed for robust air circulation. It features heavy-duty metal construction with a protective cage and adjustable speed settings.

Overview

Industrial-Grade Air Circulation

This industrial electric fan is engineered for robust performance in demanding environments such as warehouses, factories, and workshops. Featuring heavy-duty metal construction and a protective safety cage, it ensures long-term durability and reliable operation. With a powerful motor designed for high-velocity airflow and adjustable speed settings, this unit provides customizable ventilation solutions for large spaces.

Design & Construction

Construction Material	Heavy-duty metal
Safety Features	Protective cage, Stable base

Performance

Airflow Type	High-velocity
Speed Settings	Yes

Versatility

Ideal Applications

- Warehouses
- Factories
- Workshops
- Large open spaces

Adjustability

Adjustable height • Adjustable speed
