Overview

Industrial Heating Solution

This industrial-grade electric fan heater is engineered for rapid and efficient space heating in demanding environments. Built with a robust metal construction and a protective grille, it ensures durability and safety for continuous operation. The unit features an adjustable thermostat and multiple power settings, allowing users to customize the heat output to suit specific requirements in workshops, garages, or construction sites.

Technical Specifications

Power Output	5 kW
Model Number	IFH03-400A
Control Features	Adjustable Thermostat, Multiple Heat Settings

Design & Build

Portability Features

- Sturdy frame
- Integrated carry handle
- Tubular frame stand

Construction Material	Robust Metal
-----------------------	--------------

Safety

Safety Features

Protective Grille • Circular Front Grille

Applications

Ideal Environments	Workshops, Garages, Construction Sites
