

Industrial Electric Motor

This is a special purpose electric motor. It is suitable for a variety of heavy-duty tasks.

Product Overview

High-Performance Special Purpose Motor

This industrial-grade electric motor is engineered for demanding applications that require reliable and precise operation. With a versatile power range, it is suitable for various heavy-duty industrial tasks where consistent torque and control are essential. The robust design features integrated cooling to ensure longevity and stability in rugged operating environments.

Technical Specifications

Horsepower Range

0.5 HP

Minimum Power

150 HP

Maximum Power

Motor Technology

EC Variable Speed Motor

Features

Construction Details

Metallic Housing, Cooling Vents, Variable Speed Control
