

Industrial Electric Motor

This electric motor features a durable housing with integrated cooling fins for heat dissipation. It is suited for industrial and automotive applications requiring reliable rotational power.

Product Overview

Industrial Performance

This robust electric motor is engineered for reliability in demanding industrial and automotive environments. It features a durable blue housing designed with integrated cooling fins to ensure optimal heat dissipation during operation. Equipped with a high-performance capacitor, this motor delivers consistent rotational power and secure installation via its sturdy mounting base.

Physical Characteristics

Design Features

- Integrated cooling fins
- Durable housing
- Sturdy mounting base
