

Industrial Electric Motor for Refrigeration Ventilation

This high-efficiency electric motor is designed for refrigeration and ventilation applications. It features a robust construction with cooling fins and a sturdy mounting base.

Overview

Industrial Efficiency

This high-efficiency electric motor is specifically engineered for demanding refrigeration and ventilation applications. It features a robust, durable construction with specialized cooling fins to ensure optimal heat dissipation during continuous operation. The design incorporates a reliable mounting base and a dedicated terminal box, facilitating seamless integration into industrial compressors and ventilation systems.

Technical Features

Application Compatibility

- Refrigeration systems
- Ventilation equipment
- Industrial compressors

Construction Details

High-efficiency, Cooling fins, Robust construction, Industrial grade

Installation

Equipped with a sturdy mounting base for secure installation and a shaft designed for direct connection.
