

Industrial Electrical Plug

This industrial plug is designed for secure and reliable electrical connections in demanding environments. Constructed from high-impact resistant materials, it features robust housing and corrosion-resistant contacts for long-lasting performance.

Overview

Industrial Electrical Connectivity

These industrial plugs are engineered for secure and reliable electrical connections within demanding environments. Constructed from high-impact resistant materials, they feature robust housings and corrosion-resistant contacts to ensure long-lasting performance. Designed for safety and efficiency, these connectors provide an optimal power transmission solution for diverse industrial applications.

Technical Specifications

Rated Current Range

10 A Minimum Current	125 A Maximum Current
--------------------------------	---------------------------------

Ingress Protection Rating

IP44 • IP67

Rated Voltage Range

110V - 440V AC

Certifications

Compliance & Certifications

SAA, CE

Product Variants

Configuration Options

Configuration	Voltage	Protection
16A-6h	230V	IP67
32A-6h	380/415V	IP67
