

Industrial Electricity Generator

This generator is engineered as a robust power system for reliable electricity generation. It is designed for industrial or commercial applications requiring dependable backup or primary power.

Product Overview

Industrial Power Generation System

This industrial electricity generator is a robust power system designed for reliable electricity generation in demanding environments. It features a heavy-duty engine coupled with a high-performance alternator, all securely mounted on a sturdy base frame. Equipped with an integrated radiator cooling system for optimal thermal management and a comprehensive control panel, this unit is engineered for dependable backup or primary power in commercial and industrial applications.

Technical Specifications

Power Rating

300 kW

Rated Capacity

Cooling System

Integrated Radiator

Application Suitability

Industrial, Commercial, Backup Power, Primary Power

Construction & Design

Structural Components

- Heavy-duty engine
- High-performance alternator
- Sturdy base frame
- Integrated control panel
