

Industrial Elevator Motor

This industrial motor is designed for elevators. It features a robust construction with multiple electrical connection boxes and a shaft for power transmission.

Overview

Industrial Elevator Motor

This industrial motor is engineered for high-demand environments such as elevator systems and heavy machinery. Featuring a robust, durable construction with a protective grey finish and a reinforced red base, it is built to withstand the rigors of continuous operation. The unit includes accessible electrical connection boxes and a precision-engineered shaft for reliable power transmission in demanding industrial applications.

Technical Specifications

Finish

Grey Exterior • Red Base

Key Components

- Electrical connection boxes
- Power transmission shaft

Primary Application

Industrial Elevator Systems

Construction Features

Robust Design, Heavy-Duty, Industrial Grade
