

Industrial Elevator Motor

This heavy-duty elevator motor features a fully enclosed design for robust performance. It includes a cooling fan, terminal box, and lifting lugs for easy installation in industrial settings.

Product Overview

Industrial Elevator Motor

This industrial elevator motor is engineered for heavy-duty applications, featuring a robust, fully enclosed design that ensures reliable performance. Built with a heavy-gauge steel frame and a protective coating, it is designed to withstand harsh operating environments. The unit includes a dedicated cooling fan assembly and an accessible terminal box, facilitating efficient electrical connections and simplified installation via integrated lifting lugs.

Physical Construction

Frame Construction	Heavy-gauge steel
Design	Fully enclosed

Features & Accessories

Cooling System	Yes
Installation Features	Lifting lugs, Terminal box

Application Suitability

Application

Industrial • Heavy-duty • Elevator
