

Industrial Elevator Motor

This industrial elevator motor features a robust, fully enclosed design. It is intended for use in agricultural construction machinery, specifically cranes.

Overview

Industrial Elevator Motor

This robust industrial elevator motor is engineered for demanding applications, featuring a fully enclosed design for enhanced durability. It is specifically optimized for use in agricultural construction machinery, including high-performance cranes. The unit comes equipped with an integrated cooling fan assembly, a secure terminal box, and heavy-duty lifting lugs for efficient installation and maintenance.

Technical Specifications

Finish

Protective Green Coating

Key Components

- Cooling fan assembly
- Terminal box
- Heavy-duty lifting lugs

Design Type

Fully Enclosed

Applications

Primary Industry

Agricultural Construction, Crane Machinery
