

Industrial Elevator Motor

This industrial elevator motor features a robust metal housing and integrated cooling fan. It is designed for heavy-duty vertical transportation applications, ensuring reliable and efficient operation.

Overview

Industrial Elevator Motor

This high-performance industrial elevator motor is engineered for heavy-duty vertical transportation applications. Featuring a robust metal housing and an integrated cooling system, it ensures reliable and efficient operation in demanding environments. The unit is designed with installation ease in mind, including lifting eyes and a convenient side-mounted electrical enclosure.

Physical Characteristics

Housing Construction	Robust metal housing
Finish	Corrosion-resistant
Installation Features	Lifting eyes, Side-mounted electrical enclosure

Performance Features

Suitability Heavy-duty • Vertical transportation	
Cooling Mechanism	Yes
