

Industrial Elevator with Grapple Attachment

This heavy-duty elevator crane is equipped with a specialized grapple attachment for lifting and moving bulk materials. The crane features a robust steel frame and a cable-based lifting mechanism, ensuring stability and reliability during operation.

Overview

Industrial Material Handling Solution

This heavy-duty elevator crane is engineered for demanding industrial environments, specifically designed for the efficient lifting and movement of bulk materials. It features a robust steel frame construction and a reliable cable-based lifting mechanism to ensure operational stability. The integrated specialized grapple attachment, equipped with multiple curved tines, provides a secure and effective grip on various loads.

Technical Specifications

Lifting System	Cable-based
Frame Material	Robust steel
Attachment Type	Grapple with curved tines

Application

Primary Application	Industrial, Bulk Material Handling
