

# Industrial Embedded Box PC

This compact embedded Box PC is designed for industrial use. It features multiple ports and a finned heat sink for passive cooling, ensuring reliable operation.

## Overview

### Industrial Embedded Box PC

This compact and robust embedded Box PC is engineered specifically for demanding industrial environments. Featuring a passively cooled design with a finned heat sink, it ensures reliable, fanless operation in harsh conditions. It is an ideal solution for edge computing, industrial automation, and data acquisition tasks requiring high reliability.

## Connectivity

### Interface Ports

- USB 2.0
- Line In
- Line Out
- RS-422
- RS-485

## Design & Build

Cooling System	Passive cooling with finned heat sink
Model Identifier	MEC 5104

## Applications

Typical Applications	Edge Computing, Industrial Automation, Data Acquisition
