

Industrial Enclosure Fan Filter Unit

This panel fan filter unit is designed for ventilation and cooling in industrial enclosures. It features a louvered grill and filter element to prevent ingress of dust and capture airborne particles.

Overview

Industrial Cooling Solution

This panel fan filter unit is expertly designed for reliable ventilation and cooling within industrial enclosures. It features a louvered grill on the external side to effectively prevent the ingress of dust and debris, while the internal filter element captures airborne particles. Engineered for durability, it ensures long-lasting performance in demanding environments, protecting sensitive electronic components in control panels and electrical cabinets.

Technical Specifications

Design Features

- Louvered external grill
- Internal filtration media
- Durable construction
- Optimized for airflow

Protection Type

Dust Protection • Debris Prevention • Airborne Particle Filtration

Primary Application

Control Panels, Electrical Cabinets, Industrial Equipment
