

# Industrial Evaporative Cooler with Digital Controls

This industrial evaporative cooler provides efficient cooling for large spaces. It features a high-capacity water reservoir, adjustable louvers, and digital controls for easy operation.

## Overview

### High-Efficiency Cooling Solution

This industrial evaporative cooler is engineered for effective climate control in large spaces. Featuring a high-capacity water reservoir and a rigid media evaporative cooling pad, it delivers optimal performance while maintaining durability with weather-resistant materials. The unit is designed for ease of use with digital controls and high mobility on heavy-duty casters.

## Performance

Cooling Technology	Rigid media evaporative cooling pad
Fan Operation	Multi-speed adjustable fan

## Features

Control Interface	Digital control panel
Mobility	Yes
Mounting	Heavy-duty casters

## Design

Construction Material	Weather-resistant materials
Airflow Control	Adjustable louvers

## Key Metrics

### System Capacity

**1 High-Capacity**  
Water Reservoir
