

Industrial Exhaust Fan for Ventilation

This high-performance industrial exhaust fan is designed for efficient ventilation in factories and warehouses. The fan features aerodynamically designed blades to maximize air displacement and minimize noise.

Overview

High-Performance Industrial Ventilation

The 400FZD-55 is a high-performance industrial exhaust fan engineered for efficient air circulation in demanding environments such as factories, warehouses, and workshops. Its aerodynamically designed blades maximize air displacement while maintaining low noise levels, ensuring a productive and comfortable workspace. Built for durability and reliability, this fan features a robust motor and a square frame design that simplifies installation and integration into existing ventilation systems.

Technical Specifications

Suitable Environments

- Factories
- Warehouses
- Workshops
- Industrial Facilities

Model Number	400FZD-55
Key Features	High-Performance, Aerodynamic Blades, Low Noise, Robust Motor, Square Frame

Performance

Performance Highlights

400 mm

Series Identifier

Design & Build

Design Advantages

Easy Installation • Low Maintenance • Cost-Effective • Heat Reduction
