

# Industrial Fabric Cutting Machine with Reciprocating Blade

This industrial cutting machine is designed for precision fabric cutting. It features a vertical reciprocating blade, a handle for maneuverability, and a sturdy base.

## Product Overview

### Professional Textile Cutting Solution

This industrial-grade textile cutting machine features a high-precision vertical reciprocating blade designed for the demanding environments of garment manufacturing. Engineered for stability and maneuverability, it allows operators to cleanly cut through multiple layers of fabric with ease. It is an essential tool for workshops requiring high-efficiency production and consistent cutting accuracy.

## Technical Specifications

### Key Features

- Ergonomic handle for maneuverability
- Dedicated power switch
- Sturdy base for operational stability

Blade Mechanism	Vertical Reciprocating Blade
Application	Garment Manufacturing, Textile Production, Multi-layer Cutting
