

Industrial Fan Guard with Concentric Ring Design

This protective fan guard is designed for industrial applications. It features a circular design with concentric rings and radial supports.

Product Overview

Industrial Fan Guard

This industrial fan guard is engineered to provide robust protection for fan blades in demanding environments. Featuring a concentric ring design with radial supports, it ensures high structural integrity and safety by preventing accidental contact with moving parts. Its durable construction is optimized for reliable performance in industrial settings.

Physical Dimensions

Diameter	211 mm
Width	194 mm

Design Features

Design Type	Concentric Ring
Key Features	Radial Supports, Industrial Grade, Protective Mesh
