

Industrial Fire Suppression Water Tank

This heavy-duty steel fire suppression tank provides a reliable water supply for industrial fire protection systems. Coated in red for visibility and corrosion resistance, it features multiple access points, pressure gauges, and safety valves.

Overview

Industrial Fire Suppression Solution

This horizontal cylindrical water tank is engineered specifically for industrial fire protection systems. Constructed from heavy-duty steel with a corrosion-resistant red finish, it ensures high-capacity water storage and reliable performance. The unit features a robust mounting frame, integrated pressure gauges, safety valves, and auxiliary equipment housing for seamless system integration.

Design & Construction

Tank Shape	Horizontal Cylindrical
Material	Heavy-duty steel
Finish	Corrosion-resistant red coating
Mounting	Robust steel frame

Features & Safety

Key Features	Pressure Gauges, Safety Valves, Control Panel, Multiple Access Points
Auxiliary Equipment Housing	Blue enclosure with metal mesh sides
