

Industrial Flatwork Ironer for Linen

This industrial flatwork ironer is designed for high-volume linen processing. It utilizes a heated roller and pressure rollers to efficiently iron and dry flat linens like sheets, tablecloths, and napkins.

Product Overview

Industrial Flatwork Ironing System

This industrial-grade flatwork ironer is engineered for high-efficiency processing of linens including bed sheets, tablecloths, curtains, and towels. It features an advanced horizontal structure with options for single, double, or triple rollers to suit various laundry volume requirements. Equipped with a touch-screen interface and energy-saving thermal insulation, it ensures professional-quality results with low power consumption.

Key Features

Safety Mechanisms

- Finger guard auto-stop
- Anti-curliness device
- Low-pressure alarm system
- Multiple emergency stop buttons
- Pneumatic roller locking system

Certifications

CE, ISO 9001

Technical Specifications

Performance Metrics

8 m/min

Min Ironing Speed

40 m/min

Max Ironing Speed
