

Industrial Fluid Control Valve, EW150 Series, Size 2

This general machinery valve is designed for industrial applications requiring fluid control. Its robust construction ensures durability and reliability in demanding environments.

Product Overview

Industrial Fluid Control Valve

The EW150 Series Size 2 is a high-performance industrial fluid control valve engineered for rigorous applications. Its robust construction ensures long-term durability and consistent reliability in demanding operational environments. Designed specifically for industrial fluid flow management, this valve is an essential component for critical machinery infrastructure.

General Specifications

Series	EW150
Size	2
Applications	Industrial Machinery, Fluid Control

Construction

Design Focus

Robust Construction • High Durability
