

Industrial Fluid Storage Cylinder

This horizontal cylinder is designed for industrial storage and processing of fluids or gases. It features multiple support legs and a manway for access and inspection.

Product Overview

Industrial Fluid Storage Solution

This horizontal cylindrical tank is engineered for the reliable storage and processing of industrial fluids and gases. Featuring a robust metal construction suitable for pressure applications, it is designed for heavy-duty operational environments. The unit includes an integrated manway, facilitating easy access for essential maintenance and periodic inspections.

Technical Specifications

Configuration	Horizontal Cylindrical
Material	Industrial-grade Metal
Suitable Applications	Fluid Storage, Gas Storage, Industrial Processing, Pressure Applications

Features

Access Features

- Integrated Manway
- Inspection Port

Support System	Multi-leg support frame
