

Industrial Fluid Transfer Pump

This industrial pump is designed for fluid transfer applications. It features durable construction and precision-engineered components for optimal performance.

Overview

Industrial Fluid Transfer Pump

This industrial pump is a robust and reliable solution designed for demanding fluid transfer applications. Engineered for optimal performance and longevity, it features high-pressure capacity and adjustable flow rates to ensure consistent efficiency. It is suitable for a wide range of industrial environments, including manufacturing, agriculture, and chemical processing.

Technical Details

Model Number	YD480 ZLQ
Serial Number	0584002
Pump Type	Industrial Fluid Transfer

Features

Key Features

- High-pressure capacity
- Adjustable flow rates
- Durable construction
- Precision-engineered components
- Wide fluid compatibility

Applications

Suitable Industries	Manufacturing, Agriculture, Chemical Processing
---------------------	---
