

Industrial Fluid Transfer Pump

This industrial pump is designed for demanding applications requiring reliable and efficient fluid transfer. It features a robust construction with a flanged inlet and outlet for secure connection to piping systems.

Overview

Industrial Fluid Transfer Pump

This industrial pump is engineered for demanding applications that require reliable and efficient fluid transfer. Featuring a robust construction, it is equipped with flanged inlet and outlet ports to ensure secure connections to existing piping systems. The unit includes an integrated pressure relief valve for enhanced overpressure protection and a sealed motor enclosure suitable for operation in hazardous environments.

Technical Features

Application Suitability

- Demanding industrial environments
- Hazardous locations
- Versatile fluid transfer

Safety & Compliance

Pressure Relief Valve, Sealed Motor Enclosure, Ex Rated, UCB Compliant

Connection Type

Flanged Inlet/Outlet
