

Industrial Fluid Transfer Pump

These pumps are designed for industrial applications requiring fluid transfer. They are suitable for pressure boosting and circulation within industrial processes.

Product Overview

Industrial Fluid Transfer Solutions

This inventory includes a variety of high-performance industrial pumps designed for demanding marine and boiler room environments. Available units consist of vertical cooling water pumps and horizontal boiler water circulation and feed pumps, catering to diverse flow and pressure requirements. These reliable systems are built for long-term durability in heavy-duty liquid handling applications.

Inventory Details

Available Pump Inventory

Model	Type	Condition	Flow Rate	Power (kW)
SVA-125M	Vertical Cooling	Used	140 m3/h	18.5
SVA-250M	Vertical Cooling	Reconditioned	600 m3/h	75
BT100-5	Horizontal Circulating	Used	37 m3/h	18.5
BT70-5	Horizontal Circulating	Used	0.7 m3/h	7.5

Technical Specifications

Performance Metrics

600 m3/h

Max Flow Rate

60 m

Max Head

75 kW

Max Motor Power

Electrical Standards

440V, 60Hz
