

Industrial Fluid Transfer Pump

This heavy-duty pump is designed for industrial fluid transfer applications. Its robust construction features flanged connections and a lifting eye for ease of installation.

Overview

Industrial Fluid Transfer Pump

This heavy-duty industrial pump is engineered for high-volume fluid transfer in demanding environments. Featuring a robust cast iron construction, it is designed for reliable operation in gasoline and gas transfer applications. The unit includes practical design elements such as flanged connections and a lifting eye to ensure secure installation and ease of maintenance.

Technical Details

Pump Type	Centrifugal
Construction Material	Cast Iron
Connection Type	Flanged Inlet, Flanged Outlet

Features

Key Features

- Robust cast iron construction
- Integrated lifting eye for installation
- Manual handwheel adjustment
- Secure flanged piping connections

Application

Primary Application

Gasoline Transfer • Gas Transfer • High-Volume Fluid Transfer
