

Industrial Fluid Transfer Pump

This industrial pump unit is mounted on a base and designed for fluid transfer. The unit includes a cylindrical tank, a motor, and various gauges and fittings.

Overview

Industrial Fluid Transfer Pump

This industrial fluid transfer pump is a robust solution designed for efficient gasoline and gas transfer operations. Mounted on a durable blue base, the unit integrates a high-performance motor with a cylindrical tank and precise gauge instrumentation. It is engineered to meet the demanding requirements of industrial environments where reliability and accuracy in fluid handling are critical.

Technical Specifications

Included Components

- Industrial Motor
- Cylindrical Storage Tank
- Pressure Gauges
- Fluid Fittings
- Reinforced Base

Construction Features

Industrial Grade • Base Mounted • Precision Gauged

Primary Application

Gasoline Transfer, Gas Transfer, Industrial Fluid Handling
