

Industrial Fluid Transfer Pump

This pump is designed for fluid transfer applications in industrial settings. It features an electric motor directly coupled to the pump housing, suggesting a close-coupled design.

Overview

Industrial Fluid Transfer Solutions

These industrial-grade pumps are engineered for robust performance in demanding fluid transfer applications. Available in both vertical centrifugal and horizontal boiler feed configurations, these units feature durable iron casings for enhanced longevity. With a range of capacities and pressure heads available, these pumps are suitable for diverse industrial requirements.

Inventory

Available Inventory

Model	Type	Condition
EVA-100M	Vertical Centrifugal	Used
EVA-100MH	Vertical Centrifugal	Used
GHQ50-2M	Horizontal	Reconditioned
GVD200-2MX	Vertical	Reconditioned
SK-40MH	Horizontal Boiler Feed	Used

Technical Specifications

Performance Metrics

440 V

Voltage

60 Hz
