

Industrial Fluid Transfer Pump

This vertical inline pump is engineered for fluid transfer in industrial settings. Its robust electric motor is mounted on a durable, blue-painted housing, complete with flanged connections and auxiliary fittings.

Product Overview

Industrial-Grade Fluid Transfer Solution

This vertical inline pump is engineered for high-performance fluid transfer in demanding industrial environments. Featuring a robust, finned electric motor for efficient cooling and a durable, blue-painted housing, it is designed for reliability and longevity. The unit is equipped with flanged inlet and outlet connections for secure piping integration, making it an ideal choice for safely handling volatile fluids such as gasoline and gas.

Technical Specifications

Pump Configuration	Vertical Inline
Motor Cooling	Finned Air-Cooled Motor
Connection Type	Flanged Inlet/Outlet

Application & Usage

Suitable Environments

Industrial • Demanding Environments

Compatible Fluids	Gasoline, Gas, Industrial Fluids
-------------------	----------------------------------

Features

Key Features

- Vertical inline design
- Robust blue-painted housing
- Integrated auxiliary piping for control
- Secure flanged piping connections
