

Industrial Fluorescent Pendant Light

High-intensity fluorescent pendant light designed for industrial and hazardous locations. It provides reliable and energy-efficient illumination for demanding applications.

Overview

Industrial Marine Lighting Solution

The JCY32-2EF is a high-performance industrial fluorescent pendant light engineered specifically for challenging marine environments. Designed to withstand the corrosive effects of seawater, this luminaire provides reliable illumination for ship cabins and industrial work areas. It features an integrated emergency power source, ensuring safety and continuity during power interruptions.
