

Industrial Freezer

This industrial freezer is available in single or double spiral, plate, and mesh or plate belt tunnel configurations. Air blast and immersed quick freezing options are also available.

Product Overview

Industrial Freezing Solutions

This industrial freezer is designed for high-efficiency temperature control in demanding food and chemical processing environments. Featuring robust stainless steel construction and insulated paneling, it ensures optimal thermal retention and durability. The unit integrates advanced conveyor systems, supporting a variety of freezing methods including spiral, plate, tunnel, and air blast configurations to suit specific processing needs.

Technical Specifications

Primary Applications

- Fruit Processing
- Vegetable Processing
- Aquatic Product Processing
- Chemical Industry

Supported Freezing Methods

Single Spiral, Double Spiral, Plate Freezer, Mesh Belt Tunnel, Plate Belt Tunnel, Immersed Quick Freezer, Air Blast Freezer

Construction

Material

Stainless Steel

Insulation

Robust insulated panels for thermal control
