

Industrial Fuel Transfer Pump

This heavy-duty pump is designed for robust performance and reliability. It features durable cast iron construction and a precision-engineered internal mechanism for efficient fuel transfer.

Product Overview

Industrial Fuel Transfer Pump

This heavy-duty industrial fuel transfer pump is engineered for robust performance and high reliability in demanding fluid handling environments. Featuring a durable cast iron construction, it is designed to withstand rigorous use while ensuring efficient fuel transfer. With multiple ports for versatile connection options and a precision-engineered internal mechanism, this unit is an ideal solution for various industrial applications requiring dependable performance.

Technical Specifications

Model Number	EQ140D (1011D-010)
Construction Material	Cast Iron
Application	Industrial, Fuel Transfer, Fluid Handling
Port Configuration	Multiple ports for versatile connection

Key Features

Performance Highlights

- Heavy-duty construction
- Precision-engineered internal mechanism
- High durability for industrial environments
- Versatile connection options
