

Industrial Garbage Bin Mould

Moulds designed for the production of industrial garbage bins of varying sizes. These are essential for manufacturing durable and efficient waste management solutions.

Product Overview

Industrial-Grade Waste Management Moulds

These industrial garbage bin moulds are engineered for the high-volume production of durable waste management containers. Designed to produce bins suitable for both commercial and industrial environments, these moulds ensure structural integrity and long-term performance. The range includes various capacities and designs, allowing manufacturers to create robust solutions capable of withstanding heavy usage and diverse environmental conditions.

Technical Specifications

Suitable Applications

Industrial Waste • Commercial Use • Wheeled Containers • Heavy-Duty Bins

Available Model IDs

445, 444, 292, 285, 284, 237
