

# Industrial Gate Valve DN 40-200

This gate valve is designed for industrial applications requiring on/off control of fluid flow. It is constructed from durable materials and features a flanged connection for secure, leak-proof installation in piping systems.

## Product Overview

### Industrial Gate Valve

This industrial gate valve is a robust and reliable solution designed for on/off control of fluid flow in demanding piping systems. Featuring a flanged connection, it ensures a secure, leak-proof installation suitable for various industrial environments. The design minimizes pressure drop when fully open and provides a tight, dependable shut-off when closed, making it ideal for water treatment, oil refineries, and general fluid management.

## Technical Specifications

### Standard

NF Standard

### Nominal Diameter (DN)

40-200

### Valve Type

Gate Valve

## Application

### Typical Applications

- Water treatment plants
- Oil refineries
- Industrial piping systems

### Suitable Media

Water, Oil, Gas
