

Industrial Gate Valve for Fluid Control

This industrial gate valve is designed for controlling fluid flow in pipelines and industrial systems. It features a durable construction suitable for high-pressure and high-temperature environments.

Product Overview

Industrial Fluid Control Solution

This industrial gate valve is engineered for reliable fluid control in demanding industrial pipelines and systems. Featuring a robust construction, it is designed to withstand high-pressure and high-temperature environments. The manual lever mechanism provides precise on/off control, ensuring efficient flow regulation for critical industrial applications.

Technical Specifications

Key Features

- Robust construction for durability
- High-pressure environment compatibility
- High-temperature environment compatibility
- Manual lever operation

Operation Mechanism	Manual lever
Primary Applications	Pipeline Systems, Industrial Fluid Control, On/Off Flow Regulation
