

# Industrial Gate Valve for Fluid Flow Control

Industrial gate valves control fluid flow in pipelines. They feature robust construction with flanged connections and options for electric actuation or manual override.

## Product Overview

### Industrial Fluid Flow Control

This industrial gate valve is engineered for precise on/off control of fluid flow within pipelines. It features a robust construction suitable for demanding industrial environments and is equipped with an integrated electric actuator for automated operation, complemented by a manual override handwheel for versatility. Designed for secure installation, it utilizes flanged connections to ensure reliable performance.

## Product Variants

### Available Gate Valve Types

- Cast iron gate valve
- Cast steel gate valve
- Stainless steel gate valve
- Forged steel gate valves
- Knife Gate Valve
- Resilient Seated

## Technical Specifications

Pressure Rating	300#
Operation	Electric Actuator, Manual Override Handwheel
