

Industrial Gate Valve with Flanged Connections

This gate valve is designed for industrial applications requiring reliable flow control. It features a robust construction with flanged connections for secure installation in pipelines.

Product Overview

Industrial Flow Control Solution

This industrial gate valve is engineered for reliable flow regulation in demanding pipeline environments. Featuring a robust, bolted bonnet design, it ensures both structural integrity and ease of maintenance for long-term operational efficiency. The flanged connection system provides a secure, leak-resistant installation suitable for a wide range of industrial liquids and gases.

Technical Specifications

Suitable Media

- Industrial Liquids
- Gases

Connection Type	Flanged
Operation Mechanism	Manual Handwheel
Design Features	Bolted Bonnet, Minimal Pressure Drop, Tight Sealing
