

# Industrial Gate Valve with Flanged Connections

This industrial gate valve is constructed from durable materials, ensuring reliable performance. It features a handwheel for manual operation and flanged connections for secure installation.

## Product Overview

### Industrial Gate Valve for Marine Applications

This industrial gate valve is engineered specifically for reliable flow control in ship pipeline systems. Featuring robust flanged connections and manual handwheel operation, it provides secure and precise regulation of liquids and gases. Available in a wide range of durable materials and sizes, this valve is built to withstand the demanding conditions of maritime environments.

## Technical Specifications

Diameter Range	50A - 300A
Connection Type	Flanged
Material Options	Cast Iron, Cast Steel, Bronze, Brass, Stainless Steel
Primary Application	Ship Pipelines
Operation	Manual Handwheel

## Identification

### Body Markings

5K100 • FC
