

Industrial Gearbox

This gearbox is designed for power transmission and speed control. It provides reliable performance and efficient torque conversion in various industrial applications.

Overview

Industrial Gearbox Performance

This industrial gearbox is engineered for precise power transmission and reliable speed control in demanding machinery applications. Featuring a robust design with precision-machined internal components, it offers efficient torque conversion and consistent performance. Its sealed enclosure ensures durability and protection against contaminants, making it an ideal choice for equipment requiring controlled rotational motion.

Technical Specifications

Speed Reduction Ratio	3.714
Inner Gear Modulus	1M
Wave Wheel Spline Size	1M x 45R x 11Z

Operational Capacity

Suitable Load Weight	9 KG
