

Industrial Gearbox

This gearbox is designed for machinery and industrial applications, providing efficient power transmission and speed reduction. It features a robust construction for durability and long-lasting performance.

Overview

Industrial Gearbox Performance

This industrial gearbox is engineered for efficient power transmission and precise speed reduction in machinery applications. Designed with robust materials to ensure durability, it provides reliable performance for demanding industrial environments. The unit is optimized for specific load requirements, making it a dependable component for various mechanical systems.

Technical Specifications

Speed Reduction Ratio	1:3.714
Inner Gear Modulus	0.75M
Wave Wheel Spline Size	9 x 9 x 11.5 mm

Performance Metrics

Suitable Load Capacity

5 KG
Suitable Weight
