

Industrial Gearbox for Power Transmission

This gearbox is a crucial component for machinery and industrial applications, designed for efficient power transmission and speed reduction. It features a robust construction with precision-engineered gears to ensure reliable performance and long service life.

Product Overview

Industrial Gearbox for Power Transmission

This industrial gearbox is a precision-engineered component designed for efficient power transmission and speed reduction. Built for reliability and long service life, its robust construction ensures consistent performance in demanding machinery applications. The compact design allows for seamless integration into existing industrial systems, providing optimal torque output.

Technical Specifications

Speed Reduction Scale	1:3.7
Inner Gear Modulus	1M
Wave Wheel Spline Size	9x9x11.5

Performance Metrics

Suitable Load Weight	7 KG
