

Industrial Gearbox for Power Transmission

This gearbox is designed for machinery and industrial applications requiring efficient power transmission. It features robust construction and precise gear alignment for smooth operation and extended service life.

Overview

Industrial Gearbox Performance

This high-performance industrial gearbox is precision-engineered for efficient power transmission in demanding machinery applications. It features robust construction and precise gear alignment to ensure smooth operation and extended service life, even under continuous load. Designed for reliability, this unit provides optimal torque and speed control for a variety of industrial settings.

Technical Specifications

Speed Reduction Ratio	1:3.3
Wave Wheel Spline Size	9x9x11.5
Inner Gear Modulus	2.5M

Operational Limits

Suitable Load Weight	5 KG
