

Industrial Grade Extension Cord Connector

This industrial-grade extension cord connector has a robust, weatherproof design. Its durable housing protects internal contacts from moisture and debris, ensuring reliable power transmission for demanding environments.

Product Overview

Industrial-Grade Connector

The GEL-006 is an industrial-grade extension cord connector designed for secure and reliable power transmission in demanding environments. Its robust, weatherproof construction features a durable black housing and a protective cap to shield internal contacts from moisture and debris. This connector is engineered for consistent performance, making it an ideal solution for outdoor use and applications requiring a resilient power connection.
