

Industrial Grade Steel Nuts

These steel nuts are available in Grade 10 and Grade 12.9 quality. They feature precision-machined threads for secure fastening in construction machinery and related equipment.

Product Overview

Industrial Grade Steel Nuts

These industrial-grade steel nuts are engineered for high-performance fastening in demanding environments. Available in a wide variety of configurations including hexagonal, square, flange, and self-locking designs, they are suitable for heavy-duty applications such as construction machinery and excavators. Precision-machined for reliability, these components can be supplied in high-strength grades to meet specific structural requirements.

Technical Specifications

Available Grades

Grade 10 • Grade 12.9

Nut Types

Hexagonal Nuts, Square Nuts, Sphere Square Nuts, Flange Nuts, Self-locking Nylon Nuts, Self-locking Metal Nuts

Customization

Customization Capabilities

- Standard sizes available in stock
- Customized nut designs available
- Logo marking available on acceptable order quantities
