

Industrial Grade Steel Pipe

This heavy-duty steel pipe is designed for industrial applications. It features robust construction, a smooth internal bore, and threaded ends for secure connections.

Product Overview

Industrial Grade Steel Pipe Overview

This heavy-duty steel pipe is engineered specifically for demanding industrial environments including chemical processing and the oil and gas sector. Its robust construction ensures long-term durability, while the precision-engineered smooth internal bore supports efficient flow. Featuring threaded ends, this component allows for secure and seamless integration with existing industrial systems and fittings.

Technical Specifications

Material	Steel
End Connection	Threaded
Surface Finish	Metallic

Applications

Suitable Industries	Chemical Processing, Oil and Gas, Industrial Piping
