

Industrial Hammer Crusher for Material Size Reduction

This heavy-duty hammer crusher is designed for efficient size reduction of various materials. It is suitable for mining, quarrying, and recycling applications, featuring a robust construction and adjustable discharge settings.

Overview

Industrial Hammer Crusher

This heavy-duty industrial hammer crusher is engineered for efficient size reduction of various materials in mining, quarrying, and recycling applications. It features a robust construction with a large crushing chamber and high-speed rotating hammers, ensuring reliable performance. Designed for continuous operation and high throughput, the unit includes adjustable discharge settings for precise output particle size control.

Technical Specifications

Key Design Features

- Large crushing chamber
- High-speed rotating hammers
- Adjustable discharge settings
- Sturdy steel frame mounting
- Vibration dampening system

Suitable Applications

Mining, Quarrying, Recycling

Safety & Operation

Safety Mechanisms

Overload Protection • Emergency Stop

Operational Mode

Continuous operation
