

Industrial High Bay Light Fixture

This high bay light fixture is designed for large indoor spaces like warehouses and factories. It features a durable metal housing with ventilation slots and a ribbed reflector to maximize light output.

Product Overview

Industrial High Bay Lighting Solution

This industrial high bay light fixture is engineered for high-ceiling environments such as warehouses, factories, and gymnasiums. It features a robust metal housing designed with integrated ventilation slots to ensure effective heat dissipation and long-term durability. Equipped with a high-efficiency ribbed reflector, this unit maximizes light output and distribution for optimal illumination in large indoor spaces.

Technical Specifications

Lamp Compatibility	High-Intensity Discharge (HID)
Housing Features	Durable Metal Construction, Integrated Ventilation Slots, Heat Dissipation Design
Reflector Design	Ribbed Reflector

Application

Ideal Environments

- Warehouses
- Factories
- Gymnasiums
- Large Indoor Spaces
