

Industrial High Bay Reflector Light

The high bay industrial reflector light fixture is designed for illuminating large indoor spaces such as warehouses, factories, and gymnasiums. It features a durable reflector that maximizes light output and distribution, ensuring efficient and uniform illumination.

Product Overview

Industrial High Bay Reflector Light

This high bay industrial reflector light fixture is engineered specifically for illuminating large indoor spaces, including warehouses, factories, and gymnasiums. It features a durable reflector design that maximizes light output and ensures efficient, uniform distribution across high-ceiling environments. Built with high-quality materials, this fixture offers long-lasting performance and resistance to harsh industrial conditions, providing a cost-effective and easy-to-maintain lighting solution.

Technical Specifications

Durability

Durable Reflector • High-Quality Construction • Harsh Environment Resistant

Suitable Applications

Warehouses, Factories, Gymnasiums, High-ceiling spaces

Installation

High-ceiling mount
